

# Compact pressure switch for gases and air GW A4

Pressure limiters  
ÜB A4 and NB A4  
Double pressure switches  
GW A4/ GW A4

**DUNGS®**

5.02

## Technical description

The GW A4 pressure switches, the pressure limiters ÜB A4 and NB A4 and the double pressure switch GW A4 / GW A4 are adjustable pressure switches for automatic burner controls. They are suitable for switching a circuit on, off or over on changes in actual pressure value relative to the set reference value.

The reference value (switching point) is adjusted on a setting wheel provided with a scale. Test nipple integrated in metal housing as standard.

## Application

Pressure monitoring in firing, ventilation and air-conditioning systems. Suitable for gases of families 1,2,3 and other neutral gaseous media.

## Approvals

EU type test approval as per EU Gas Appliance Directive. TÜV (German Technical Inspectorate) inspection for pressure switches of special construction as per TRD 604 and VdTÜV Technical Data Sheet, edition 100/1, as well as Class "S" as per EN 1854.

GW...A4	CE-0085 AO 0012
ÜB...A4	CE-0085 AO 0026
NB...A4	CE-0085 AO 0039

Approvals in other important gas-consuming countries. Special designs for the North American market with U<sub>L</sub>, FM and CSA registrations.

### Functional description

Single-acting pressure switch or pressure limiter in pressure range. The pressure switches and/or pressure limiters work without using any auxiliary power.

### GW A4 pressure switch

The control unit responds to pressure. If the set reference value is exceeded or undershot, the circuit is switched on, off or over.

### ÜB A4, NB A4 pressure limiters

The control unit responds to pressure. Interlock is performed when the set reference value is exceeded or undershot.

The "Locked" switching state is indicated by a glow lamp.

Restart is only possible by activating the reset button on the setting wheel of the pressure limiter after the operating pressure is attained.

**ÜB A4:** Switches and locks when the set pressure is exceeded.

**NB A4:** Switches and locks when the set pressure is undershot.

### Double pressure switch

#### GW A4 / GW A4

Combination of two GW A4 single pressure switches flanged together. The setting of the two reference values is performed separately and independently. This permits a combination of different reference value setting ranges. The same medium and pressure are applied to the two control units.

#### GW A4 switching function

##### As pressure rises:

1 NC opens, 2 NO closes

##### As pressure falls:

1 NC closes, 2 NO opens

#### ÜB A4 switching function

##### As pressure rises

2 NO closes, 1 NC opens

Glow lamp ON, locked.

#### NB A4 switching function

##### As pressure falls

2 NO opens, 1 NC closes

Glow lamp ON, locked.

Operating state

### Definition of switching difference $\Delta p$

The switching difference  $\Delta p$  is the pressure difference between the upper and lower switching pressures

## Specifications

Max. operating pressure	NB, ÜB, GW 3 A4 - GW 150 A4 NB, ÜB, GW 500 A4	500 mbar (50 kPa) 600 mbar (60 kPa)
Pressure connection	Standard: Special design:	G 1/4 female thread on centre of housing underside as per ISO 228 additionally G 1/4 female thread on opposite measuring connection side
Measuring connection	Test nipple integrated in metal housing, Ø 9	
Temperature range	Ambient temperature Medium temperature Storage temperature	-15 °C to +60 °C -15 °C to +60 °C -30 °C to +80 °C
Materials	Housing Switch Diaphragms Switching contact	aluminium die casting polycarbonate NBR basis Ag, fine silver, optional (Au)
Switching voltage	AC eff. min. 10 V DC min. 12 V	max. 250 V max. 48 V
Nominal current	AC eff. 10 A	
Switching current	AC eff. 6 A AC eff. 3 A AC eff. min. 20 mA DC min. 20 mA DC max. 1 A	at cos φ 1 at cos φ 0,6
Electrical connection	Standard: Special design:	at screw terminals via PG* 11 cable gland (* heavy-gauge conduit thread) plug connection for line sockets as per DIN 43 650 A, 3-pin with protective contact
Degree of protection	IP 54 as per IEC 529 (EN 60529)	
Setting tolerance	±15% switching point deviation referred to reference value, adjusted as pressure rises, vertical diaphragm position	

## Dimensions [mm]

### GW ... A4, ÜB ... A4, NB ... A4

### GW ... A4 / GW ... A4

## Installation position

**Standard installation position**

**When installed horizontally, the pressure switch switches at a pressure higher by approx. 0.5 mbar.**

**When installed horizontally overhead, the pressure switch switches at a pressure lower by approx. 0.5 mbar.**

**When installed in an intermediate installation position, the pressure switch switches at pressure deviating from the set reference value by max.  $\pm 0.5$  mbar.**

## Designation

## Order example

### Pressure switch design

ÜB pressure limiter

### Setting range

30 - 150 mbar

### Contact material

Ag fine silver (standard)

### Electrical connection

PG screw union

### Test nipple

MS 9

### Screw plug

At position 0

### Pressure connection

G 1/4 at position 3
